PROFILE SUMMARY

Aspiring Software Engineer with interests in Pine Script development, Linux, system basics, troubleshooting, automation, and open source development.

Currently building practical portfolio projects, including SR Hunter V4, a TradingView Pine Script indicator focused on structured market analysis and decision-support workflow.

SKILLS

Software Engineering Basics	Pine Script Development	TradingView Indicator Development
HTML	CSS	JavaScript Basics
GitHub	GitHub Pages	Linux Basics
Networking Basics	Troubleshooting	Automation Basics
Technical Documentation	Open Source Learning	System Architecture Basics

PROJECTS

SR Hunter V4 — TradingView Pine Script Indicator

Featured Project | Pine Script, TradingView, Decision-Support Workflow

- Built a TradingView Pine Script indicator focused on structured market analysis and decision-support workflow.
- Designed a layered validation concept covering trend, structure, location, trigger, quality, risk, decision, and UI output.
- Built the project as a decision-support tool, not a blind buy/sell signal generator.
- Practiced modular thinking, readable logic structure, and technical documentation.
- Repository: github.com/raafikaziiz-coder/tradingview-pine-scripts

Personal Portfolio Website

- Built a dark elegant single-page portfolio website using HTML, CSS, and GitHub Pages.
- Showcases profile, stack, featured project, resume summary, education, and contact information.
- Live website: raafikaziiz-coder.github.io

TradingView Pine Scripts & Learning Projects

- Created Pine Script learning projects and TradingView indicator experiments.
- Explored technical analysis tooling, structured market validation, and documentation habits.

EDUCATION

SMK Darul Qur'an Wal Irsyad Wonosari

Vocational High School — Multimedia | 2018 - 2021 | Graduated

Universitas AMIKOM Yogyakarta

Bachelor of Informatics | Currently on academic leave at Semester 6

TARGET ROLES

- Software Engineer Intern / Entry-Level
- System Engineer Intern / Entry-Level
- Automation Engineer Intern / Entry-Level
- Open Source Contributor / Developer
- Technical Architect Learning Path

ADDITIONAL INFORMATION

- Open to internship and entry-level opportunities.

- Interested in software engineering, automation, system engineering, and open source development.
- Learning through real projects, documentation, and continuous improvement.
